

AccessPoint

Access for CCTV and Drain Clearance.

A secure point of entry into DN70, DN100 and DN150 plastic, ductile and cast iron pipes.

Designed for entry into drainage systems where no man hole exists or there is no other means of access.

Installation takes less than a minute, although this may increase when cutting into very old cast iron pipe.

Creates a professional and tidy access point, ready for use at any time.

Benefits

- Quick and easy installation
- Can be removed and refitted
- Withstands up to 1 bar
- Pre-assembled for direct insertion into the host pipe

Access Points are available in kits or in replacement packs of 10 or 100, without tools.

The Access Point kit includes:

- 10 x AccessPoints
- 1 x De-Burring Tool
- 1 x 6mm Allen Key
- 1 x 54mm Diamond Core Drill
